

HIGH ACCURACY DIFFERENTIAL PRESSURE TRANSMITTER HAWP-D Series

The HAWP-D differential pressure transmitter is designed with dual sensors that enables it to accept high pressures ranges in ranges from 5 PSI to 500 PSI. All models can handle overload pressure 2X the maximum full scale range and burst pressure is 5X the maximum full scale range.

Features include field selectable pressure ranges, output signal types, output reversal and damping, port swapping and bidirectional for the most flexible applications. The output signal is factory calibrated and temperature compensated for the highest start-up accuracy.

SPECIFICATIONS:

of Echilcanons.	
Media Compatibility	17-4 PH stainless steel
Pressure Ranges	. 4 switch selectable ranges per
-	model - See ordering
Line Pressure	Max. line pressure is the highest
	of the selectable ranges on each
	model
	. Max. 2X highest range per model
Burst Pressure	. Max. 5X highest range per model
Accuracy	
	(Range 4 = 1%)
Pressure Cycles	.>100 million
Surge Damping	Normal: 4 second averaging
	Slow: 8 second averaging,
	switch selectable
Sensor Operating Range	40° to 85°C (-40° to 185°F)
Compensated Range	.0° to 55°C (32° to 130°F)
Operating Environment	. 0° to 50°C (32° to 122°F),
	10-90% RH condensing
Stability	±0.25% typical (1 year)
Zero Adjust	
	digital input
Operating Humidity	0 to 95% RH non-condensing
Power Supply	18 to 28 Vac/Vdc (non-isolated
	half-wave rectified)
Consumption	. 100 mA max @ 24 Vdc with LCD
	backlight, 35 mA with backlight
	disabled
Output Signal	3-wire transmitter; selectable
	4-20mA active (sourcing), 0-5 or
	0-10 Vdc
Pressure Connections	
Enclosure	
	IP65 (Nema 4)
Dimensions	
	(5.7" X 3.95" X 2.5")
Shock	
Vibration	
Wiring Connections	
	(14 to 22 AWG)
Optional LCD Display	35 mm x 15 mm (1.4" w x 0.6"h)
	alpha-numeric 2 line x 8 character
	Resolution - 1 psi
	Backlight - Enable or disable via

PART NUMBER SELECTED

EXAMPLE: Differential pressure, 10, 20, 50,100 psi, w/LCD

jumper

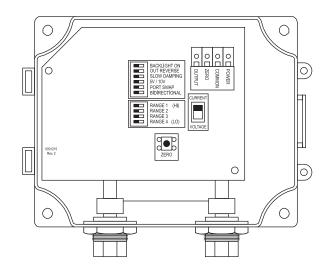

For complete installation and wiring details, please refer to the product installation instructions.

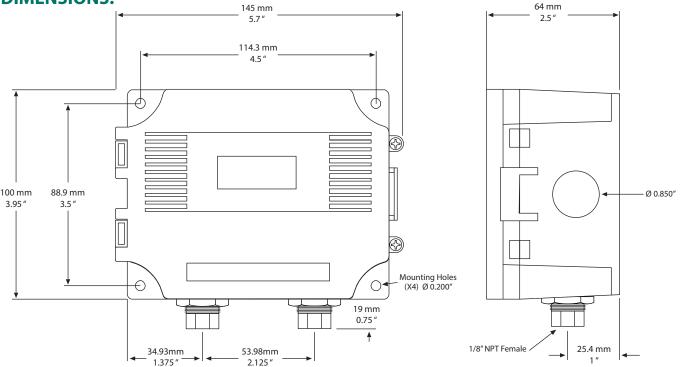

The HAWP mounts on any surface using the four holes provided on the base of the unit. Make sure there is enough space around the unit to connect the pressure tubing without kinking and avoid locations where severe vibrations or excessive moisture are present.

The unit may be mounted in any position but typically is installed on a vertical surface with pressure ports on the right and the cable entrance on the left. The enclosure has a standard opening for a 1/2" conduit and may be installed with either conduit and a conduit coupler or a cable gland type fitting.

Note: Due to the 2 sensor design of the HAWP-D Series differential pressure transmitter, pressure equalization on the ports is not relevant and having a greater pressure on one port will not damage the device. Therfore a pressure equalization manifold is not required. The maximum line pressure can not exceed 2x maximum pressure of the device - i.e. for a HAWP-D-101 max. pressure is 50 PSI, and therefore the max line pressure is 100 PSI.

Greystone Energy Systems Inc. is one of North America's largest ISO registered manufacturers of HVAC sensors and transducers for Building Automation Management Systems.

We have conscientiously established a worldwide reputation as an industry leader by maintaining leadingedge design technology, prompt technical support, and a commitment to on-time deliveries. We take pride in our Quality Management System which is ISO 9001 certified, assuring our customers of consistent product reliability.
