

THERMOWELLS

Machined Wells

ACI's Machined Thermowells are used with temperature instruments in process systems where gas or liquid medias are used to provide a degree of protection for the sensing element when installed inside of a pipe, tank, or piece of equipment. The thermowell provides easy access for NIST Certified applications and enables users to easily replace the sensor without having to drain the entire system. Thermowells also protect the small diameter sensing probes from stresses created by high temperatures and pressures, corrosive environments, or the flow of gas or liquid medias through pipes or equipment. It is recommended to follow a Wake Frequency calculator using the ASME PTC 19.3 TW-2016 standard to help prevent vibrational

destruction from damaging the thermowell. ACI's standard thermowells are made of 304 stainless steel which ensures long lasting reliability and corrosion resistance. Optional 316 Stainless Steel is available for use in applications where higher corrosion resistance is required. This series is machined from solid bar stock to precision tolerances which provides maximum heat transfer when used with a corresponding ACI sensor. When necessary, thermal grease is available from ACI to improve the sensor's response time. Insertion depth should be long enough to permit the entire temperature-sensitive section of the temperature probe to project into the medium being monitored, thus maximizing measurement accuracy.

Applications: Chilled and Hot Water Systems, Hydronic Heating Systems, Boilers, Pumps, Compressors, Chillers, Refrigeration Systems, Tanks, Aquariums, Process Control Systems, Compressed Air and Gas lines

All ACI Thermowells are covered by ACI's Five Year Limited Warranty. The warranty can be found in the front of ACI's Sensors & Transmitters catalog, as well as on ACI's website.

PRODUCT SPECIFICATIONS

Thermowell Hex Size:	1.125" (28.57 mm)
Insertion Length:	See Ordering Grid (Tolerance: +/- 0.050" (+/- 1.27 mm))
Thermowell Bore Diameter:	0.260" +/- 0.003" (6.60 mm +/- 0.0762 mm)
Shank Type:	Stepped and Straight (See Ordering Grid)
Shank Dimensions:	Straight: Root Diameter: 0.500" (12.7 mm); Tip Diameter: 0.500" (12.7 mm)
+/- 0.010" (+/- 0.254 mm)	Stepped: Root Diameter: 0.630" (16.002 mm); Tip Diameter: 0.500" (12.7 mm)
Stepped Thermowell Reduced Tip Length:	2.500" (63.5 mm)
Tip Thickness:	0.250" (6.35 mm)
Internal "Instrument" Thread:	1/2" NPS
External "Process" Thread:	1/2" MNPT - 14
Material Type:	304 and 316 Series Stainless Steel Available (See Ordering Grid)
Surface Finish:	Polished to 16 RMS

MAXIMUM PRESSURE VS TEMPERATURE RATINGS [304 STAINLESS STEEL]
