### LF24 US Technical Data Sheet On/Off, Spring Return, AC/DC 24 V

Technical Data		
Power Supply	24 VAC, ±20%, 50/60 Hz, 24 VDC, ±10%	
Power consumption in operation	tion 5 W	
Power consumption in rest	2.5 W	
position		
Transformer sizing	7 VA (class 2 power source)	
Shaft Diameter	3/81/2" round, centers on 1/2"	
Electrical Connection	18 GA appliance cable, 3 ft [1 m], with 1/2"	
	conduit connector	
Overload Protection	electronic throughout 095° rotation	
Electrical Protection	actuators are double insulated	
Angle of rotation	Max. 95°,	
Torque motor	35 in-lb [4 Nm]	
Direction of motion motor	selectable with switch 0/1	
Direction of motion fail-safe	reversible with cw/ccw mounting	
Position indication	Mechanical	
Running Time (Motor)	75 s	
Running time fail-safe	<25 s @ -4122°F [-2050°C], <60 s @	
	-22°F [-30°C]	
Ambient humidity	max. 95% r.H., non-condensing	
Ambient temperature	-22122°F [-3050°C]	
Storage temperature	je temperature -40176°F [-4080°C]	
Degree of Protection	P54, NEMA 2	
Housing material	galvanized steel	
Agency Listing	cULus acc. To UL 873 and CAN/CSA C22.2	
	No. 24-93	
Noise level, motor	50 dB(A)	
Noise level, fail-safe	62 dB(A)	
Servicing	maintenance-free	
Quality Standard	ISO 9001	
Weight	3.2 lb [1.5 kg]	

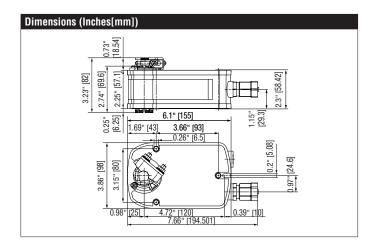

†Rated Impulse Voltage 800V, Type of action 1.AA, Control Pollution Degree 3

### Application

For On/Off, fail-safe control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. Control is On/Off from an auxiliary contact or a manual switch. The actuator is mounted directly to a damper shaft from 3/8" up to 1/2" in diameter by means of its universal clamp, 1/2" shaft centered at delivery. For shafts up to 3/4" use K6-1 accessory. A crank arm and several mounting brackets are available for applications where the actuator cannot be direct coupled to the damper shaft.

### Operation

The LF series actuators provide true spring return operation for reliable fail-safe application and positive close off on air tight dampers. The spring return system provides consistent torque to the damper with, and without, power applied to the actuator. The LF series provides 95° of rotation and is provided with a graduated position indicator showing 0° to 95°. The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. Power consumption is reduced in holding mode. The actuator is double insulated so an electrical ground connection is not necessary.

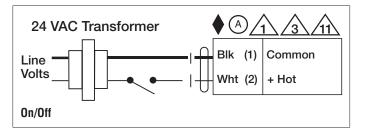

## LF24 US Technical Data Sheet

On/Off, Spring Return, AC/DC 24 V

Shaft extension
Standard LF clamp (3/8" to 1/2").
Shaft clamp reversible
Ball joint
Ball joint
Damper crank arm
Actuator arm
V-bolt Kit for KH-LF.
Anti-rotation bracket LF.
Push rod for KG10A ball joint (36" L, 3/8" diameter).
Push rod for KG6 & KG8 ball joints (36" L, 5/16" diameter).
8 mm and 10 mm wrench.
Angle of rotation limiter
Form fit adapter
Right angle bracket for ZS-260.
Stand-off bracket for ZS-260.
LF right angle bracket 4-1/2x5-1/2x2-1/2" (HxWxD).
Damper clip for damper blade, 3.5" width.
Damper clip for damper blade, 6" width.
LF crankarm adaptor kit (includes ZG-112).
LF crankarm adaptor kit (T bracket included).
Shaft extension for 3/8" diameter shafts (4" L).
Shaft extension for 1/2" diameter shafts (5" L).
Weather shield - galvaneal 13x8x6" (LxWxD).
Base plate for ZS-100.
Weather shield - PC w/ foam seal 16x8-3/8x4" (LxWxD).
Explosion proof housing.
NEMA 4X, 304 stainless steel enclosure.
NEMA 4X, 316L stainless steel enclosure.
1/2" shaft adaptor, standard wtih ZS-300(-5).
3/4" shaft adaptor for ZS-300(-5).
1" shaft adaptor for ZS-300(-5).
Shaft mount, non-Mercury aux. switch for 1/2" dia. shafts.
Shaft mount, non-Mercury aux. switch for 1" dia. shafts.
Low voltage and control signal simulator.
120 to 24 VAC, 40 VA transformer.

### Typical Specification

On/Off spring return damper actuators shall be direct coupled type which require no crank arm and linkage and be capable of direct mounting to a shaft up to a 3/4" diameter and center on a 1/2" shaft (default). Actuator shall deliver a minimum output torque of 35 in-lbs. The actuator must be designed so that they may be used for either clockwise or counter clockwise failsafe operation. Actuators shall be protected from overload at all angles of rotation. If required, one SPDT auxiliary switch shall be provided with one switch having the capability of being adjustable. Actuators with auxiliary switch must be constructed to meet the requirement for Double Insulation so an electrical ground connection is not required to meet agency listings. Actuators shall be cULus listed, have a 5 year warranty, and be manufactured under ISO 9001 International Quality Control Standards. Actuators shall be as manufactured by Belimo.

Wiring Diagrams		
	<b>WARNING! LIVE ELECTRICAL COMPONENTS!</b> During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.	
	Meets cULus requirements without the need of an electrical ground connection.	
(A)	Actuators with appliance cables are numbered.	
$\underline{1}$	Provide overload protection and disconnect as required.	
$\underline{\land}$	Actuators may also be powered by 24 VDC.	

Actuators may be connected in parallel if not mechanically linked. Power consumption and input impedance must be observed.
