SERIES LPTK

GAS PRESSURE TEST KIT

Convenient Kit Perfect For Testing LP and Natural Gas Controls

The **Series LPTK Gas Pressure Test Kit** is ideal for testing LP and natural gas lines and controls. The kit's gage shows if proper pressure is present or if a leak exists. Series LPTK is easier to use than a manometer and includes a sturdy case for added durability and safe handling.

FEATURES/BENEFITS

- Calibration screw on the back of the gage
- Simple interface for ease of use

APPLICATIONS

- Combustion gas supply monitoring and testing

MODEL CHART

Model	Range
LPTK-01	0 to 15 in w.c. & 0 to 8.6 oz/in ²
LPTK-02	0 to 32 in w.c. & 0 to 18.5 oz/in ²
LPTK-03	0 to 4 kPa & 0 to 40 mbar
LPTK-04	0 to 8 kPa & 0 to 80 mbar

Note: Consult factory for other range options.

SPECIFICATIONS

Service: Compatible gases.

Wetted Materials: Gage: brass, hose: rubber.

Housing Materials: Steel with black finish.

Lens: Polycarbonate.

Accuracy: $\pm 3\%$ FS.

Pressure Limit: 110% of range.

Temperature Limits: -40 to 150°F (-40 to 65°C).

Size: 2-1/2" (63 mm).

Process Connections: 1/8" NPT, brass hose barb.

Case: ABS plastic.

Hose: Rubber, 36" (91.4 cm).

Tube Nipple: Rubber.

Weight: 1.75 lb (0.8 kg).
