T9000 Series Touch Screen Thermostats

Futuristic and Hi-tech Exterior Design

Winner of the 2020 Red Dot Award for Product Design

With a frameless large touch screen, the T9000 Series Thermostats can display ambient temperature clearly and intuitively. The buttons are sensitive and very user-friendly. The futuristic and hi-tech exterior design is loved by users from high-end office buildings, hotels, private hospitals, and high-end residential buildings.

Superb materials for a stable performance

The service life of the relay is designed to be turned on / off for **100,000 times**. The eco-friendly shell materials meet the **CE standard** for flame retardants. High-quality materials and components ensure that the thermostats are safe, eco-friendly and reliable. The PCB was produced with a high-standard gold depositing procedure, to ensure better electrical performance, more sensitive touch, and more durable.

The thermostats have been certified by multiple industry standards, including CE, RCM, REACH, RoHS, BTL, WEEE and GB, to ensure stable performance.

Energy-efficient and eco-friendly

The T9000 Series Touch Screen Thermostats can be used to control ECM motors far better than industry standards, as they can reduce the motor's energy consumption by 30-50% and the motor's noise by 1-2 dB (A), to make the environment more comfortable.

In addition to the delay on / off function, the T9000 Series Touch Screen Thermostats can also activate the **occupancy (eco) mode** with the signal from a door card, a PIR (Passive Infrared) sensor or other dry contacts, to switch the set point of temperature, and to keep fan motor on low speed or shut down, so as to improve efficiency and save energy.

Intelligent control and system optimization

The T9000 Series Touch Screen Thermostats support multiple operating modes, including cooling, heating, ventilating, and floor heating. They also provide other functions, including the occupancy mode and T9600 support remote temperature sensor. Some models adopt a 32-bit high-performance MCU to ensure more accurate control and more powerful functions. Some models support Modbus or BACnet protocols that can be seamlessly connected to the building automation system, to achieve the best room climate control.

Diverse application scenarios

Each of the T9000 Series Touch Screen Thermostats supports multiple application scenarios. They can control multiple types of equipment, including the 2-pipe fan coil unit (FCU) / 4-pipe FCU; the water source heat pumps; the simple air handling units (AHUs), boilers and floor heating systems; the 3-speed motors and ECM motors; the 2-wiring / 3-wiring on / off valves, modulating control valves and floor heating valves; as well as other air purification units (e.g. TiO_2 / ESP).

T9800 Series Touch Screen Thermostats

Strong system compatibility, adopt the BACnet or Modbus communication protocol

Build in humidity sensor, easy environmental control for BA system

T9800-TB21-1JA0 support 0~10 VDC input, directly
access CO₂ or IAQ sensor signal,
simplify design and save cost

The thermostats are powerful and can be used to control 2-pipe FCU / 4-pipe FCU, Single-speed / 3-speed motors / ECM motors, and on / off valves / regulating valves. Its ${\rm TiO_2}$ / ESP features can make the environment to cleaner. The occupancy mode supports comfortable and more energy-efficient temperature setting. The BI input supports dry contact signals from door cards, PIR (Passive Infrared) sensor, dew point sensors, filter's differential pressure switch, etc. They support connect to remote sensors, sensor type JCI 10K NTC Temperature Sensors like TE-636S-1.

The products apply to multiple scenarios, for example, they can be used for FCU, single-speed AHUs, floor heating systems, water source heat pumps, and boilers.

Product Number	Application	Fan Control	Valve Control	Others Control	Input	Power Supply
T9800-TF21-1JS0	2-pipe FCU, Prop valve	3-speed Fan	1 Proportion Valves		1 BI, Occupancy 1 Remote sensor	24 VAC
	4-pipe FCU, Prop valve	3-speed Fan	2 Proportion Valves			
	2-pipe FCU, On / Off valve	ECM fan	1 On / Off Valve			
	4-pipe FCU, On / Off valve	ECM fan	2 On / Off Valves			
	2-pipe FCU, 3-wire On / Off valve	ECM fan	1 3-wire On / Off Valve			
	2-pipe FCU with floor heating, On / Off valve	ECM fan	1 On / Off Valve	1 Floor Heating		
	2-pipe FCU with TiO ₂ / ESP, On / Off valve	ECM fan	1 On / Off Valve	1 TiO ₂ / ESP		
	Water source heat pump	ECM fan		1 Compressor 1 Revert Valve		
	2-pipe FCU, Prop valve	3-speed Fan	1 Proportion Valve			
	2-pipe FCU, Prop valve with Floor Heating	ECM fan	1 Proportion Valve	1 Floor Heating		
	2-pipe FCU, Prop valve with Radiator	ECM fan	1 Proportion Valve	1 Radiator		
	AHU	Single speed fan	1 Proportion Valve	1 Damper		
T9800-TF20-1JS0	2-pipe FCU, On / Off valve	3-speed Fan	1 On / Off Valve		1 BI, Occupancy 1 Remote sensor	100-240 VAC
	4-pipe FCU, On / Off valve	3-speed Fan	2 On / Off Valves			
	2-pipe FCU, 3-wire On / Off valve	3-speed Fan	1 3-wire On / Off Valve			
	2-pipe FCU with floor heating, On / Off valve	3-speed Fan	1 On / Off Valve	1 Floor Heating		
	2-pipe FCU with TiO ₂ / ESP, On / Off valve	3-speed Fan	1 On / Off Valve	1 TiO ₂ / ESP		
	Water source heat pump	3-speed Fan		1 Compressor 1 Revert Valve		
	Boiler			Boiler		
T9800-TB21-1JA0	2-pipe FCU, Prop valve	3-speed Fan	1 Proportion Valve		1 x 0~10 VDC input for feedback signal 1 BI, Occupancy 1 Remote sensor

Note:

- 1. User can configure one model to different applications by parameter setting
- 2. $\rm I_{R}$ is steady-state current of FCU motor, and $\rm I_{x}$ is transient current of FCU motor
- 3. Remote sensor need to be ordered separately
