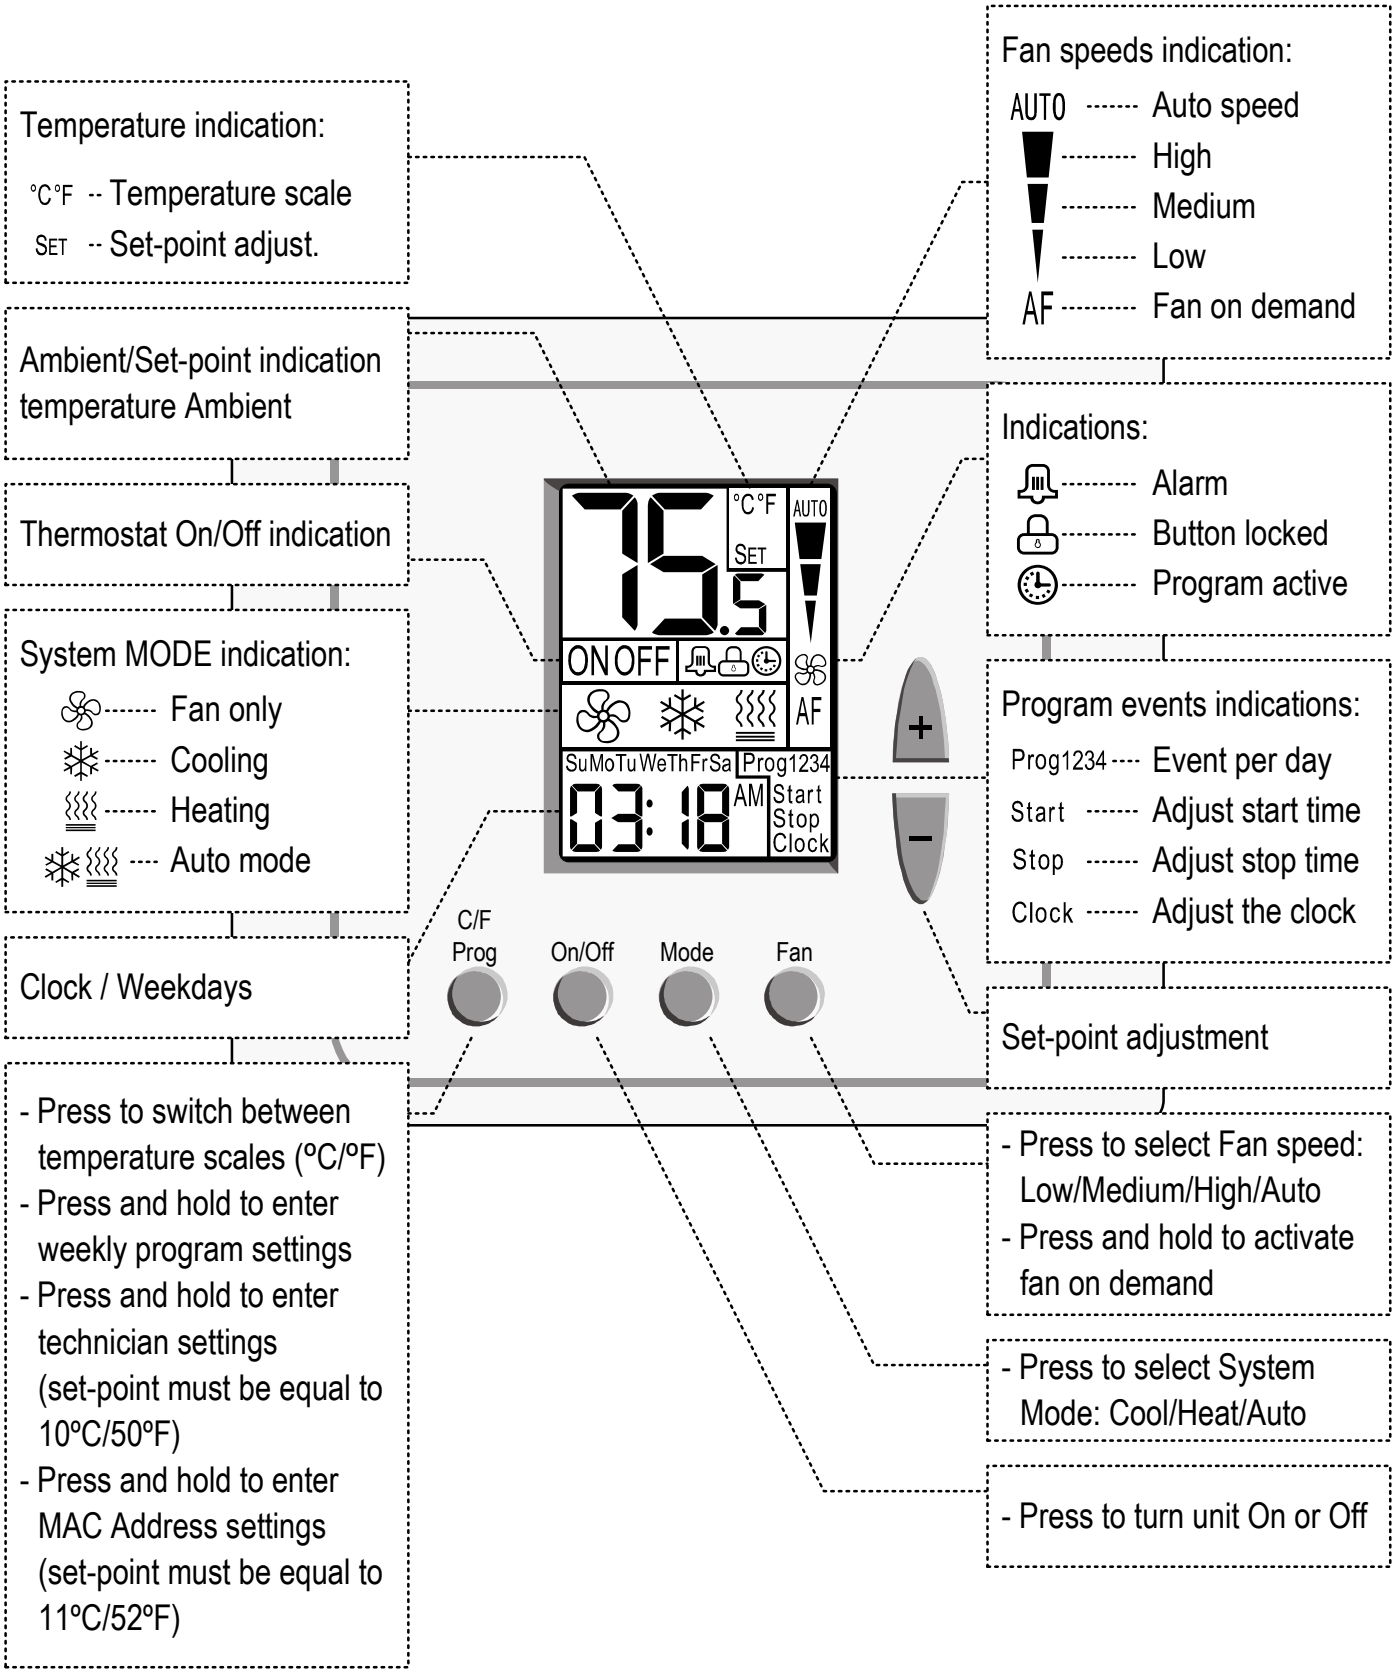
P35 – Enable/Disable Freeze protection
P36 – Freeze protection cut-in set point
P37 – Freeze protection cut-out set point
P40 – View filter counter (hours) – Read only
P41 – Reset filter time
P42 – Adjust filter alarm delay counter (hours)
P43 – Soft start in heat – cut-in temperature
P44 – Soft start in heat – cut-out temperature
P45 – Cool differential band
P46 – Cool differential band offset
P47 – Heat differential band
P48 – Heat differential band offset
P49 – Shift between Cool and Heat in Auto mode
P50 – Shift between Cooling stages
P51 – Shift between Heating stages
P52 – Cool valve proportional band
P53 – Cool proportional low limit
P54 – Cool proportional high limit
P55 – Heat valve proportional band
P56 – Heat proportional low limit
P57 – Heat proportional high limit
P60 – Proportional ON percent
P61 – Proportional OFF percent
P63 – Time on-delay between cooling stages
P64 – Time off-delay between cooling stages
P65 – Fan VFS proportional band in cooling
P66 – Fan VFS proportional band in heating
P67 – Fan VFS Low speed percent in cooling
P68 – Fan VFS Medium speed percent in cooling
P69 – Fan VFS High speed percent in cooling
P70 – Fan VFS Low speed percent in heating
P71 – Fan VFS Medium speed percent in heating
P72 – Fan VFS High speed percent in heating
P74 – VFS Medium speed differential
P75 – VFS High speed differential
P76 – Fan VFS Low limit in cooling
P77 – Fan VFS High limit in cooling
P78 – Fan VFS Low limit in heating
P79 – Fan VFS High limit in heating
P83 – View T2 temperature sensor readings
P84 – View T3 temperature sensor readings
P85 – Deice in cool – cut-in temperature
P86 – Deice in cool – cut-out temperature
P87 – Deice in heat time
P88 – Deice in heat break time
P89 – Deice in heat – cut-in temperature
P90 – Deice in heat – cut-out temperature
P91 – Compressor delay
P98 – Display set point only (hide room temperature)
P99 – One or Two set points
P101 – Screen dimming delay
P107 – Weekly program configuration
P108 – Weekly program - events per day
P109 – Weekly program event configuration
P114 – Cool PID Kp
P115 – Heat PID Kp
P116 – Cool PID Ki
P117 – Heat PID Ki
P118 – Cool PID Kd
P119 – Heat PID Kd
P122 – Cool Proportional output threshold time
P123 – Heat Proportional output threshold time
P160 – Minimum compressor ON time
P161 – Minimum compressor OFF time
P170 – Economizer low limit temperature
P198 – Not in use
P200 – Restore defaults

Alarms and Indications ……..…..……..……. 50

Operating instructions

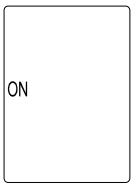
Quick guide



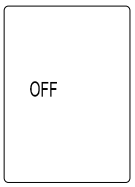
Operating instructions

Turning the thermostat ON and OFF

- Press the [On/Off] button to turn the thermostat ON or OFF.



ON



OFF

Selecting temperature scale

- Press the [C/F] button to switch between temperature scales.

Celsius

Fahrenheit

Adjusting the Set point temperature

In <u>One</u> set point configuration:

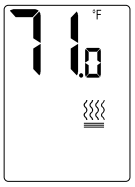
- Press the [+] or [-] buttons once to view the set point temperature.
- Use the [+] or [-] buttons to adjust the set point.

Set point

In <u>Two</u> set points configuration:

- Press the [+] or [-] buttons once – "❄" and the set point temperature for cooling will appear on display.
- Use the [+] or [-] buttons to adjust the set point for cooling.
- Press the [Mode] button or wait 3 seconds – "♨" and the set point temperature for heating will appear on display.
- Use the [+] or [-] buttons to adjust the set point for heating.

Set point For cooling



Set point For heating

Notes:

- The set point for cooling must be higher than the set point for heating.

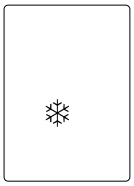
Operating instructions (Cont')

Selecting system mode

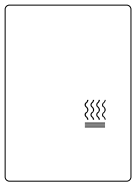
- Press the [Mode] button to switch between system modes.

  Notes:

  1. During demand for cooling or heating, the active mode will flash.
  2. In Auto mode, the active mode icon (Cool or Heat) will flash.
  3. Auto mode is not available in 2-Pipe system configuration.

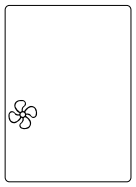


Cool



Heat

Auto



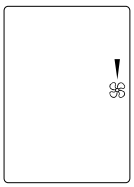
Fan only

Selecting Fan speeds (for 2 and 3 fan speeds configuration)

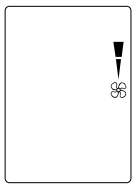
- Press the [Fan] button to switch between fan speeds.

  Notes:

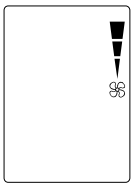
  1. In Auto speed, the active fan speed icon will appear on display.
  2. Medium speed available in 3 speeds configuration.



Low



Medium



High

Auto

Turning Auto fan ON or OFF (fan on demand)

In 1 speed configuration:

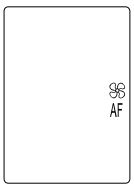
- Press the [Fan] button to turn Auto fan ON or OFF.

In 2 and 3 speeds configuration:

Press and hold the [Fan] button for 7 seconds to turn Auto fan ON or OFF.

- When ON, the fan will run on demand for cooling or heating,
- When OFF, the fan will run continuously.

  Note: Auto fan cannot be selected in Fan only mode.

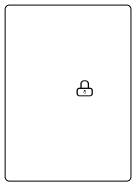


Auto fan OFF

Auto fan ON

Locking the thermostat buttons

- Press and hold the [Mode] button for 7 seconds to lock or unlock the thermostat buttons - please refer to technician parameters P04-P07 to configure which buttons will be locked.
- When locked, the lock icon ( ) will appear on display with any attempt to press a locked button.

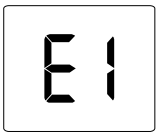


Lock indications

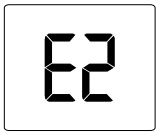
Operating instructions (Cont')

Economy mode

- Economy mode can be activated by triggering a Window contact - Remote on/off switch, Window contact - remote economy switch, door switch, key-tag, the external PIR sensor (passive infrared sensor)
- When Economy mode is active, the thermostat will use special economy set points for cooling and heating set by technician.
  Please refer to objects "EconomySetpointinHeat" and "EconomySetpointinCool" in the technician setting section of this manual.

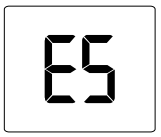


Economy by:
- Window contact - Remote on/off switch
- Window contact - Remote economy switch

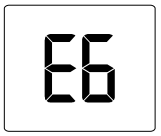


Economy by External PIR

Economy by door switch



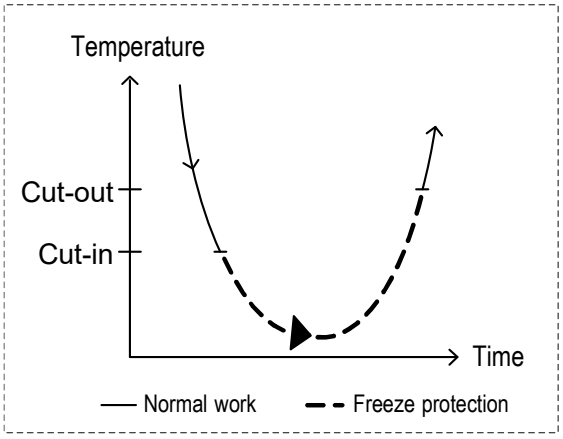
Economy by key-tag



Economy by keeping Low Fan running

Freeze Protection

The Freeze protection feature will not allow the room temperature to drop below predefined cut-in temperature. Depending on which configuration the system is operating under (W/WO Heat pump) this feature will force the system to operate in heat mode and activate the fan.
This feature will take effect when the thermostat is either ON or OFF. When the room temperature rises above the predefined cut-out temperature, the thermostat will return to its previous state.
When freeze protection is activated, the display alternates between "AL" and room temperature.



Economizer

Economizer is used to reduce the energy consumed by the cooling systems, by using low external air temperatures to assist in the chilling process. When outdoor temperatures are lower relative to indoor (room) temperatures, the system utilizes the cool outdoor air as a free cooling source.

The outdoor temperature (Teconomizer) triggering the activation of the economizer, can be measured by the temperature sensor connected to T1,0 terminals (technician parameter P08="05").

Whenever there is demand for cooling and the outdoor temperature conditions allow the operation of the economizer, it will operate together with the regular cooling system and will not replace it.

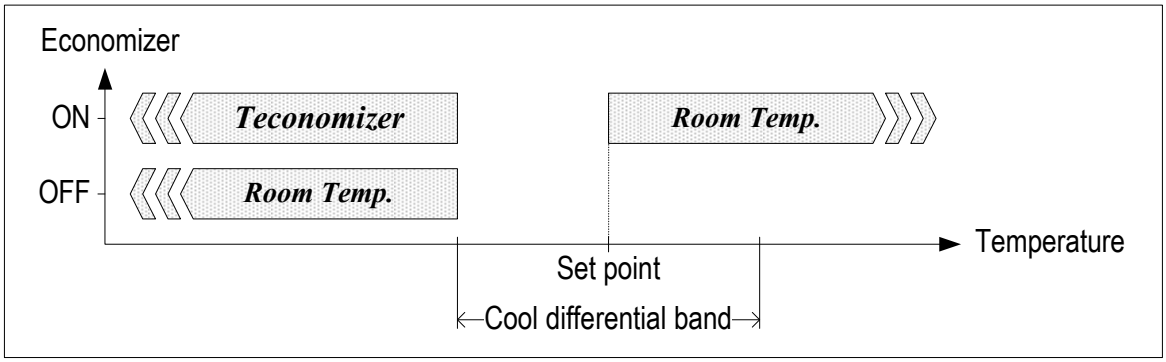
Economizer will start and run as long as both of the following conditions are satisfied:

1. $$Teconomizer\ temperature < Room\ temperature - \frac{Cool\ differential\ band}{2}$$

2. $$Room\ Temperature > Set\ point\ temperature$$

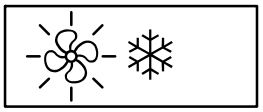
Economizer will stop when the following condition is satisfied:

1. $$Room\ Temperature < Set\ point\ temperature - \frac{Cool\ differential\ band}{2}$$



Indication for the Economizer operation:

When Economizer is active, the “Cool” symbol will appear (or flash when active) on display and the “Fan” symbol will flash.



Economizer active

Weekly program

A. General

Prior to programming, make sure that parameters P107, P108 and P109 in the technician settings are configured correctly.

Program types

- The thermostat can be configured to run four different types of weekly programs (set by technician parameter P107):
  1. Seven days program with same parameters for all days.
  2. Seven days program with different parameters for each day of the week.
  3. One schedule for the weekdays (Monday to Friday), one schedule for Saturday and another one for Sunday.
  4. One schedule for the weekdays (Monday to Friday) and another one for Saturday and Sunday.

Daily events

- Each daily program can use 2 or 4 schedule events per day (set by technician parameter P108).
- There are two options for settings the schedule events (set by technician parameter P109):
  1. **"EU Type"** - Start time and Stop time.
  2. **"US Type"** - Start time, set-point temperatures, system mode and fan speed.

Important:
Parameter P107 must not be equal to "0" in order to enable weekly program capabilities.
Changing P107 to "0" will disable all program capabilities and reset programmed information.

Activate/Temporarily disable/Override the program

- **Activate the program**
  - When the program is activated, a clock icon is shown on display
  - If a clock icon is not shown on display, make sure that the set-point temperature is not 10/11ºC or 50/52ºF, press and hold the [On/Off] button to activate the program.
- **Temporarily disable the program** - without losing programmed information - e.g. when out of office or when leaving for vacation:
  - Make sure that the set-point temperature is not 10/11ºC or 50/52ºF.
  - Press and hold the [On/Off] button to temporarily disable the program.
  - Press and hold the [On/Off] button again to reactivate to the program.
- **Override the program** - the occupant can temporarily change the set point temperature to be different than the set point temperature specified by the program. Changes will be affective until the next program event begins.

Weekly program (Cont')

Programming procedure

- The detailed programming procedure is described in the next sections. Make sure to follow the right programming procedure, suitable for the program type and features selected by technician settings.
- Press the [C/F-Prog] button to enter and proceed through the steps of the real time clock and programming procedure.
- Use the [+] and [-] buttons to select or change value of a flashing icon.
- It is recommended to select programming values prior to the actual programming.

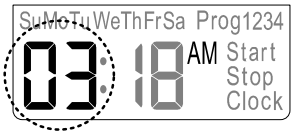
Exit the programming procedure

- At anytime during the programming procedure, Press the [On/Off] button to exit and return to normal display - any changed values will be saved.

Adjusting the time and day of the week

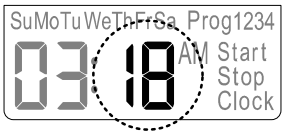
- Press and hold the [C/F - Prog] button - the word "Clock" will appear on display.

Hours



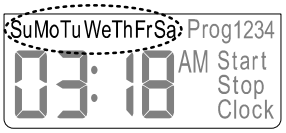
- The HOURS will flash.
- Use the [+] and [-] buttons to adjust the hours.

Minutes



- Press the [C/F - Prog] button again – the MINUTES will flash.
- Use the [+] and [-] buttons to adjust the hours.

Days



- Press the [C/F - Prog] button again – the DAYS will flash.
- Use the [+] and [-] buttons to select the day.

- If technician parameter P107 is not set to "00" (program is enabled), Press the [C/F – Prog] button to enter programming procedure.

  Make sure to follow the right programming procedure, suitable for the program type and features selected by technician settings.

  Section C – "EU Type"

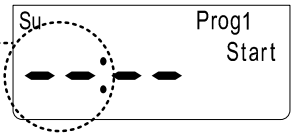
  Section D – "US Type"
- Otherwise, press the [C/F - Prog] button to return to normal display.

Weekly program (Cont')

Adjusting "EU type" daily programs – Start time / Stop time

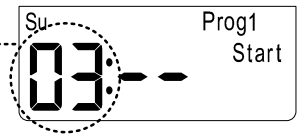
Start time

- Press the [C/F – Prog] button – the programmed weekday(s), "Prog 1" indicating the first program event of the day and the word **"Start"** will appear on display.
- The **HOURS** will flash

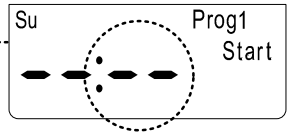


Note: If this is the first time a program is being set, the symbols "--" will flash.

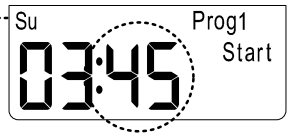
- Use the [+] and [-] buttons to adjust the start time hours of the first event



- Press the [C/F – Prog] button again – the **MINUTES** will flash

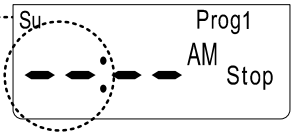


- Use the [+] and [-] buttons to adjust the start time minutes of the first event

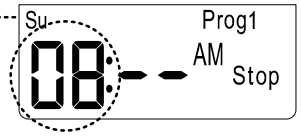


Stop time

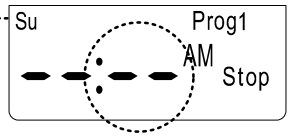
- Press the [C/F – Prog] button again – the word **"Stop"** will appear on display
- The **HOURS** will flash



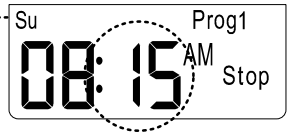
- Use the [+] and [-] buttons to adjust the stop time hours of the first event



- Press the [C/F – Prog] button again – the **MINUTES** will flash



- Use the [+] and [-] buttons to adjust the stop time minutes of the first event



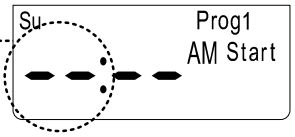
- **Follow the steps above for the other schedule events of the same day (Prog 2 for 2 event per day, or Prog 2, 3 and 4 for four events per day).**
- **Follow the steps above for all the other days.**

Weekly program (Cont')

Adjusting "US type" daily programs – Start time / Mode / Fan speed / Set points

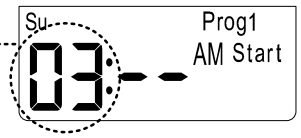
Start time

- Press the [C/F – Prog] button – the programmed weekday(s), "Prog 1" indicating the first program event of the day and the word **"Start"** will appear on display.
- The **HOURS** will flash

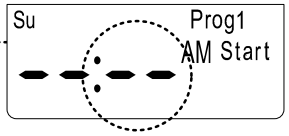


Note: If this is the first time a program is being set, the symbols "--" will flash.

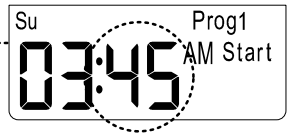
- Use the [+] and [-] buttons to adjust the start time hours of the first event



- Press the [C/F – Prog] button again – the **MINUTES** will flash

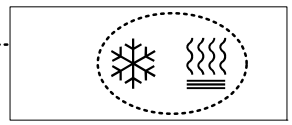


- Use the [+] and [-] buttons to adjust the start time minutes of the first event

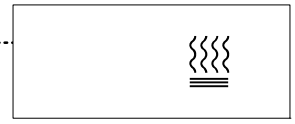


System mode and fan speeds

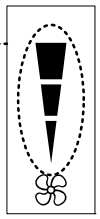
- Press the [C/F – Prog] button again – the system **MODES** will flash



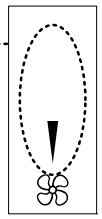
- Use the [+] and [-] buttons to select the system mode of the first event



- Press the [C/F – Prog] button again – the **FAN SPEEDS** will flash

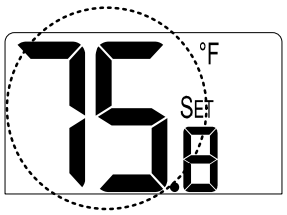


- Use the [+] and [-] buttons to select the fan speed of the first event



Weekly program (Cont')

Set point



- Press the [C/F – Prog] button again – the set point will flash.

  Note: If the thermostat is configured to have two set points, first adjusts the set point for cooling and then the set point for heating.

- Use the [+] and [-] buttons to select the set point of the first event

- **Follow the steps above for the other schedule events of the same day (Prog 2 for 2 event per day, or Prog 2, 3 and 4 for four events per day).**
- **Follow the steps above for all the other days.**

Installation

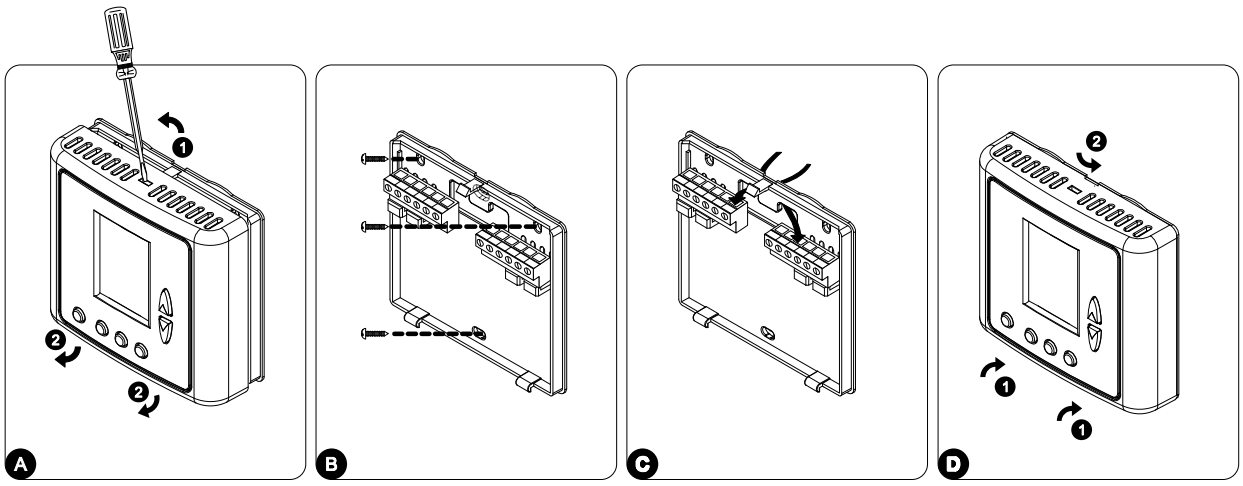
The ALT24 is designed for wall mounting in the room to be controlled. It should be located where the occupant can easily read the LCD display and use the controls. If the built in temperature sensor is being used to measure room temperature, the module should be placed where the temperature is representative of the general room conditions. Cold or warm air draughts; radiant heat and direct sunlight should be avoided.

General points to follow:

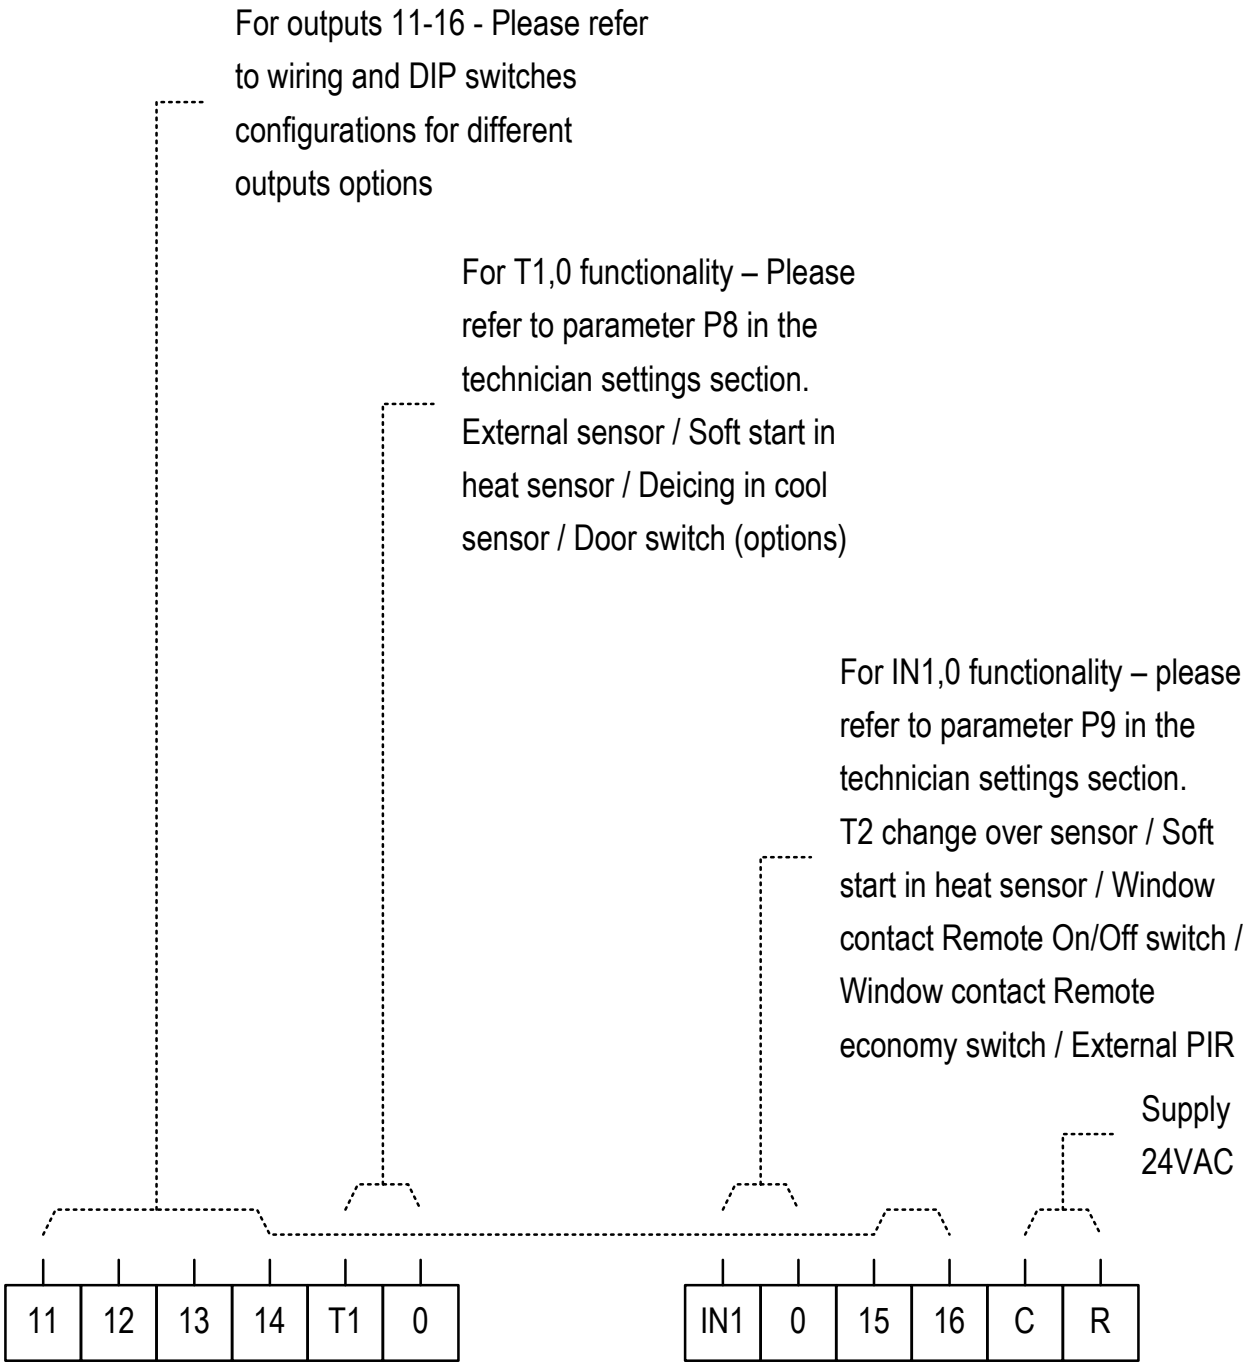
- Disconnect power to the main board before installing the unit.
- The standard height to install this unit is 1.5 meter (5 feet) from the floor.

Installation procedure:

A. Separate the front panel from back panel by pressing the tongue located in the top of the unit and pull the back panel out.
B. Use three 3 X ¼" screws to attach the back panel to the wall.
C. Make electrical connections as shown on enclosed electrical wiring diagram.
D. Install the cove to the back panel; first the two bottom tabs and then the top tongue. Push until tight against the wall.



Wiring



For outputs 11-16 - Please refer to wiring and DIP switches configurations for different outputs options
For T1,0 functionality – Please refer to parameter P8 in the technician settings section. External sensor / Soft start in heat sensor / Deicing in cool sensor / Door switch (options)
For IN1,0 functionality – please refer to parameter P9 in the technician settings section. T2 change over sensor / Soft start in heat sensor / Window contact Remote On/Off switch / Window contact Remote economy switch / External PIR
Supply 24VAC

Technician Settings

Enter technician settings mode:

- Adjust the set point temperature to 10ºC or 50ºF.
- Press and hold the [C/F] button for 10 seconds to enter technician settings mode.
- “P01” will appear on display.

View objects and make adjustments:

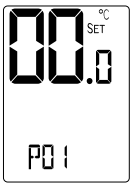
- Use the [Mode] button to step forward between different objects (parameters).
- Use the [Fan] button to step backward between different objects (parameters).
- Press the [On/Off] button to exit technician settings and return to normal display.
- If no button is pressed for 60 seconds, the thermostat will automatically exit technician settings and return to normal display.
- Use the [+] and [-] buttons to make adjustments when required.

P01 – Offset for temperature readings calibration

Range: -6…+6°C / -9…+9°F.

Default: 0°C / 0°F.

Note: The offset will influence both internal or external sensors.



Offset for temperature calibration

(°C) (°F)

P02 – Set point limit for cooling

Range: 5…35°C / 41…95°F.

Default: 10°C / 50°F.

Note: The thermostat will stop cooling regardless of the users set-point

Set point limit for cooling

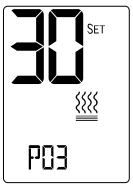
(°C) (°F)

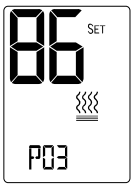
P03 – Set point limit for heating

Range: 5…35°C / 41…95°F.

Default: 30°C / 86°F.

Note: The thermostat will stop heating regardless of the users set-point





Set point limit for heating

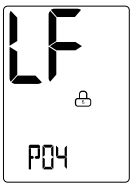
(°C) (°F)

Technician Settings (Cont')

P04 – Enable/Disable the option to lock the [Fan] button

"LF" + "🔒" [Fan] button can be locked

"LF" only [Fan] button cannot be locked



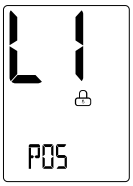
[Fan] Can be locked

[Fan] Cannot be locked

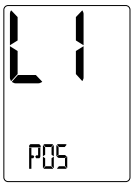
P05 – Enable/Disable the option to lock the [Mode] button

"L1" + "🔒" [Mode] button can be locked

"L1" only [Mode] button cannot be locked



[Mode] Can be locked

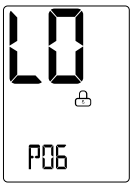


[Mode] Cannot be locked

P06 – Enable/Disable the option to lock the [On/Off] button

"L0" + "🔒" [On/Off] button can be locked

"L0" only [On/Off] button cannot be locked



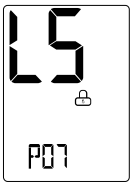
[On/Off] Can be locked

[On/Off] Cannot be locked

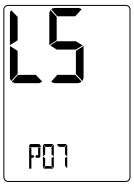
P07 – Enable/Disable the option to lock the [+] and [-] buttons (SET)

"LS" + "🔒" [+] and [-] buttons can be locked

"LS" only [+] and [-] buttons cannot be locked



[+] and [-] Can be locked



[+] and [-] Cannot be locked

P04-P07 Note:

When the option to lock one or more buttons is enabled, these buttons will be automatically locked when leaving technician settings and returning to normal display. In normal display, press and hold the [Mode] button for 7 seconds to unlock/relock these buttons.

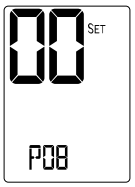
Technician Settings (Cont')

P08 – Functionality of T1 terminals

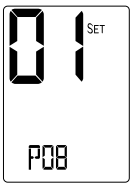
"00" - T1 terminals are not in use
"01" - External sensor
"02" - *T3 Soft start in heat sensor (FC) or **Deicing in cool (AC)
"03" - Door switch
"04" - Key tag
"05" - T Economizer (DIP switch SW1.6 must be ON)

* In heating mode, the fan will not start before there is hot water in the coil.

** Allow deicing operation of indoor coil in cooling.



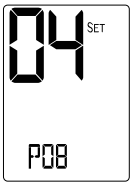
T1 terminals Not in use



T1 sensor (External sensor)

T3 Soft start in heat sensor (FC) or Deicing in cool sensor (AC)

Door switch



Key tag

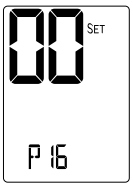
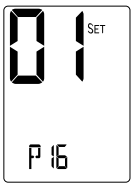
P16 – Enable/Disable Occupancy sensor

"00" - Disable

"01" - Enable



Disable occ. sensor



Enable occ. sensor

P17 – PIR (occupancy sensor) delay time before switching to unoccupied mode (ON delay)

Range: 0...900 minutes.

Default: 20 minutes.

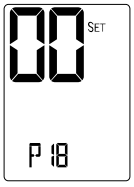
PIR ON delay (minutes)

P18 – Door switch or key tag configuration

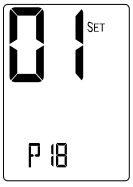
"00" - Switch On or Off by door switch or key tag

"01" - Changing the set point temperature

"02" - Switching fan speed to Low



Switch On or Off



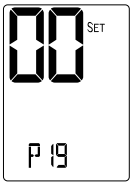
Change set-points

Switch to fan low

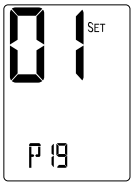
P19 – PIR (Occupancy sensor) polarity

"00" - Normally open

"01" - Normally close



PIR Normally open



PIR Normally close

P25 – Economy set point for cooling

Range: 5…35°C / 41…95°F.

Default: 30°C / 86°F.

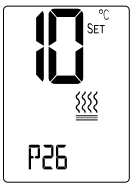
EC set point in cooling (°C) (°F)

Technician Settings (Cont')

P26 – Economy set point for heating

Range: 5…35°C / 41…95°F.

Default: 10°C / 50°F.



EC set point in heating

(°C) **(°F)**

P27 – On-delay time on-delay between heating stages

Range: 0….600 seconds

Default: 5 seconds

On delay heating stages

P28 – Off-delay time between heating stages

Range: 0….600 seconds

Default: 1 second

Off delay heating stages

P29 – LCD Backlight ON or OFF

"00" - LCD Backlight ON

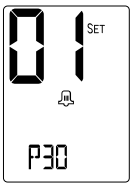
"01" - LCD Backlight OFF

Backlight ON **Backlight OFF**

P30 – Beeper ON or OFF

"01" - Beeper ON

"00" - Beeper OFF



Beeper ON **Beeper OFF**

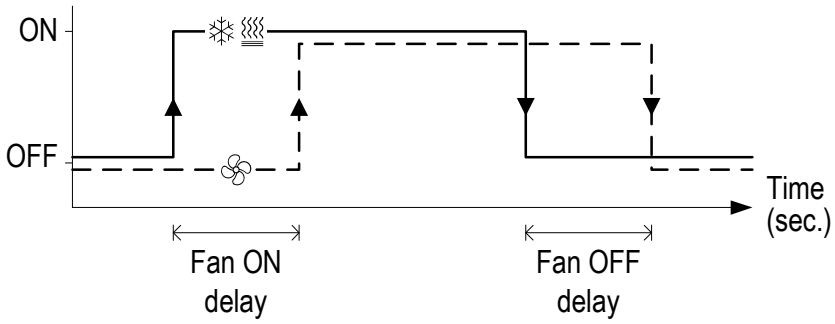
Fan on/off delay
with fan on demand (auto fan) active.

—— Valve
– – Fan



P31 – Fan ON delay in cooling (FC Only!)
Range: 0…120 seconds
Default: 0 seconds (no delay)

Fan ON delay in cooling (seconds)

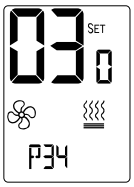
P32 – Fan OFF delay in cooling
Range: 0…120 seconds
Default: 0 seconds (no delay)

Fan OFF delay in cooling (seconds)

P33 – Fan ON delay in heating (FC Only!)
Range: 0…120 seconds
Default: 0 seconds (no delay)

Fan ON delay in heating (seconds)

P34 – Fan OFF delay in heating
Range: 0…120 seconds
Default: 30 seconds



Fan OFF delay in heating (seconds)

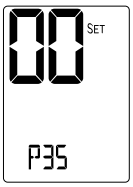
Technician Settings (Cont')

P35 – Enable/Disable Freeze protection

"00" - Disable Freeze protection

"01" - Enable Freeze protection

Note: If enabled, freeze protection will start when the thermostat is either ON or OFF and regardless of the current system mode.



Disable freeze protection

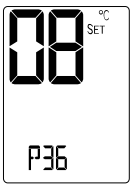
Enable freeze protection

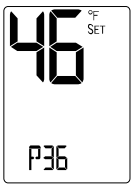
P36 – Freeze protection cut-in set point

Range: 8...15°C / 46…59°F

Default: 8°C / 46°F

The room ambient temperature which will trigger Heating ON.





Freeze protection cut-in set point

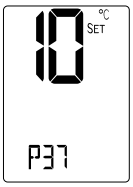
(°C) (°F)

P37 – Freeze protection cut-out set point

Range: 10...17°C / 50…63°F

Default: 10°C / 50°F

The room ambient temperature which will switch the Heating back OFF.



Freeze protection cut-out set point

(°C) (°F)

Technician Settings (Cont')

P40 – View filter counter (hours) – Read only

Range: 0…999 hours

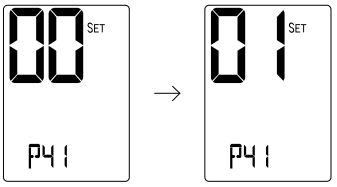
The filter counter is related to Fan running time.

View filter Counter (hours)

P41 – Reset filter time

Press the [+] button to reset the filter counter.

The display will change from "00" to "01" and back to "00".



Reset filter counter

P42 – Adjust filter alarm delay time counter (hours)

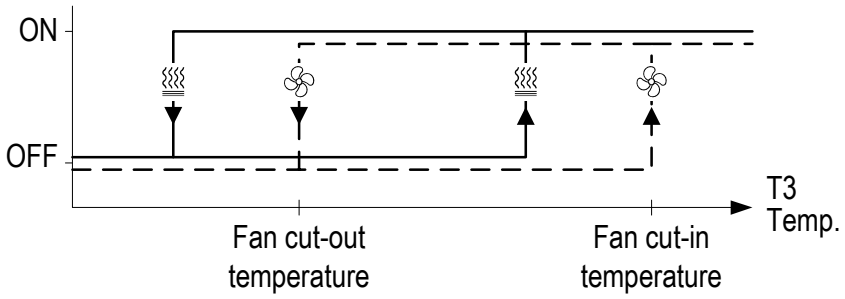
Range: 0…999 hours

Default: 0 hours (0 = Disable)

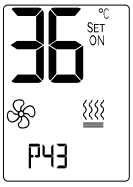
Adjust filter alarm delay time (hours)

P43 – P44
Soft start in heat
with fan on demand
(auto fan) active.

—— Heat valve
– – Fan

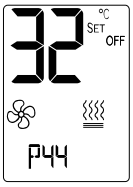


P43 – Soft start in heat – cut-in temperature (FC Only!)
The fan will not start before the temperature on T3 sensor reaches the cut-in temperature.
Please refer to technician parameters P08/P09.
Range: 14...37°C / 57…99°F
Default: 36°C / 97°F



Soft start heat cut-in temperature
(°C) **(°F)**

P44 – Soft start in heat – cut-out temperature (FC Only!)
The fan will stop if the temperature on T3 sensor drops below the cut-out temperature.
Please refer to technician parameters P08/P09.
Range: 12...35°C / 54…95°F
Default: 32°C / 90°F



Soft start heat cut-out temperature
(°C) **(°F)**

Shift between Cool & Heat in Auto mode
(°C) (°F)

P50 – Shift between Cooling stages (AC only!)

Range: 0...10°C / 0…20°F
Default: 2°C / 4°F

Shift between cooling stages
(°C) (°F)

P51 – Shift between Heating stages

Range: 0...49°C / 0…88°F
Default: 2°C / 4°F

Shift between heating stages
(°C) (°F)

Technician Settings (Cont')

P52 – Cool valve proportional band (FC Only!)

Range: 2...10°C / 4-20°F

Default: 2°C / 4°F

0-10V Valve opening from fully closed to fully open.

Cool valve proportional band (°C) (°F)

P53 – Cool proportional low limit (FC Only!)

Range: 0...100%

Default: 0%

Minimum valve opening.

Cool prop. low limit (%)

P54 – Cool proportional high limit (FC Only!)

Range: 0...100%

Default: 100%

Maximum valve opening.

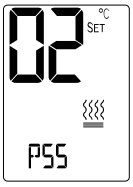
Cool prop. high limit (%)

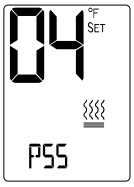
P55 – Heat valve proportional band (FC Only!)

Range: 1...10°C / 2-18°F

Default: 2°C / 4°F

0-10V Valve opening from fully closed to fully open.





Cool valve proportional band (°C) (°F)

P56 – Heat proportional low limit (FC Only!)

Range: 0...100%

Default: 0%

Minimum valve opening.

Heat prop. low limit (%)

P57 – Heat proportional high limit (FC Only!)

Range: 0...100%

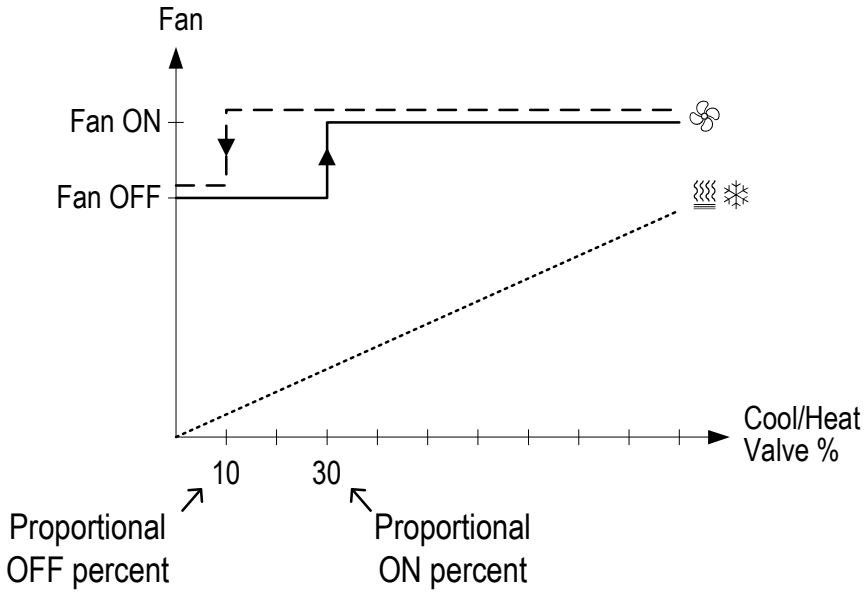
Default: 100%

Maximum valve opening.

Heat prop. high limit (%)

P60
Fan turns ON when the Cool or Heat valve reaches the "Proportional ON percent"

P61
Fan turns OFF when the Cool or Heat valve drops below the "Proportional OFF percent"



P60 – Proportional ON percent (FC Only!)
Range: 0...30%
Default: 30%

Proportional ON percent (%)

P61 – Proportional OFF percent (FC Only!)
Range: 0...20%
Default: 10%

Proportional OFF percent (%)

P63 – Time on-delay between cooling stages (AC only!)
Range: 0…600 seconds
Default: 5 seconds

On Delay cooling stages

P64 – Time off-delay between cooling stages (AC only!)
Range: 0…600 seconds
Default: 1 seconds

Off Delay cooling stages

Technician Settings (Cont')

P65 – Fan VFS proportional band in cooling

Range: 1...10°C / 2…18°F

Default: 2°C / 4°F

0-10V fan speed from off closed to fully running.

VFS Proportional band in cooling

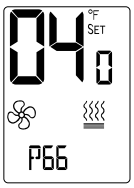
(°C) (°F)

P66 – Fan VFS proportional band in heating

Range: 1...10°C / 2…18°F

Default: 2°C / 4°F

0-10V fan speed from off closed to fully running.



VFS Proportional band in heating

(°C) (°F)

P67 – Fan VFS Low speed percent in cooling

Range: 0...30%

Default: 20%

VFS Low % in cooling

P68 – Fan VFS Medium speed percent in cooling

Range: 30...60%

Default: 50%

VFS Med % in cooling

P69 – Fan VFS High speed percent in cooling

Range: 60...100%

Default: 90%

VFS High % in cooling

T3 Sensor readings (°C/°F)

P85 – Deice in cool – cut-in temperature (AC only!)

Range: -9.5…+8°C / 15...46°F Default: 0°C / 32°F

The indoor unit coil temperature in which deicing will start.

Deice in cool cut-in temperature (°C) (°F)

P86 – Deice in cool – cut-out temperature (AC only!)

Range: 2...20°C / 36...68°F Default: 8°C / 46°F

The indoor unit coil temperature in which deicing will stop.

Deice in cool cut-out temperature (°C) (°F)

P87 – Deice in heat time (AC only!)

Range: 2...7 Minutes

Default: 5 Minutes

The length of deicing procedure.

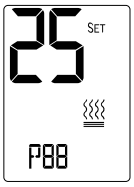
Deice in heat time

P88 – Deice in heat break time (AC only!)

Range: 10...30 Minutes

Default: 25 Minutes

The time interval between deicing cycles.



Deice in heat break time

Technician Settings (Cont')

P89 – Deice in heat – cut-in temperature (AC only!)

Range: -9.5…+8°C / 15...46°F

Default: 0°C / 32°F

The outdoor unit coil temperature in which deicing will start.

Deice in heat cut-in temperature (°C)

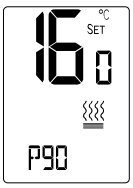
Deice in heat cut-in temperature (°F)

P90 – Deice in heat – cut-out temperature (AC only!)

Range: 2...20°C / 35...68°F

Default: 16°C / 61°F

The outdoor unit coil temperature in which deicing will stop.



Deice in heat cut-out temperature (°C)

Deice in heat cut-out temperature (°F)

P91 – Compressor delay (AC only!)

Range: 0...360 Seconds

Default: 240 Seconds

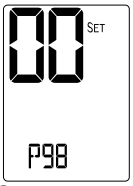
DIP Switch SW3.5 must be in "OFF" position – compressor delay enabled!

Compressor delay

P98 – Display set point only (hide room temperature)

"00" - Display both set point and room temperatures

"01" - Display only the set point temperature



Show room temperature

Hide room temperature
